

the 1990s, the number of people with a disability in the United States has increased by 25% (U.S. Census Bureau 2000).

As a result of the increase in the number of people with disabilities, the need for accessible information has become more acute. The National Center for Accessible Information (NCAI) has estimated that the number of people with disabilities who are unable to access information is 100 million (NCAI 2000).

One of the most important areas of information access is the Internet. The Internet has become an important source of information for people with disabilities. However, the Internet is not accessible to people with disabilities. The National Center for Accessible Information (NCAI) has estimated that 100 million people with disabilities are unable to access information on the Internet (NCAI 2000).

The purpose of this study was to investigate the barriers to Internet access for people with disabilities.

The study was conducted in two phases. The first phase was a literature review of the barriers to Internet access for people with disabilities.

The second phase was a survey of people with disabilities. The survey was conducted in two parts. The first part was a survey of the barriers to Internet access for people with disabilities. The second part was a survey of the barriers to Internet access for people with disabilities.

The results of the survey are presented in this paper. The barriers to Internet access for people with disabilities are discussed in detail.

The barriers to Internet access for people with disabilities are discussed in detail. The barriers to Internet access for people with disabilities are discussed in detail.

the 1990s, the number of people with a disability in the United States has increased by 25% (U.S. Census Bureau 2000).

As a result of the increase in the number of people with a disability, the need for accessible information has become more acute. The Americans with Disabilities Act (ADA) of 1990 (Public Law 101-354) has provided a legal framework for the development of accessible information. The ADA requires that information be accessible to people with disabilities.

The ADA defines information as any material, regardless of the form or medium, that is used to convey information. This includes printed materials, audio recordings, video recordings, and computer files. The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.

The ADA requires that information be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities. This means that information must be accessible to people with disabilities in the same way that it is accessible to people without disabilities.
